Career Objective

To use my coding expertise to succeed as a front end web developer, where I can implement rich and immersive user interfaces into websites and applications

Work Experience

GataLabs
Front End Developer, Intern
(September 2013 - December 2013)
- Collaborated with the designer in developing the front end of the administration section of the main website
- Managed the building of the website to garner consumer interest and gather merchant and user information
- Responsible for the re-factoring of code for the landing page

TheYMC
Teaching Assistant, Volunteer
(September 2013 - Present)
- Assisted classes of 20 students in a series of 9-week courses that introduced web development to beginners

Ladies Learning Code
Mentor
(August 2013 - Present)
- Coached one-day workshops including Introduction to HTML, Introduction to Responsive Web Design and Introduction to Ruby

Technical Skills

- HTML
- Jade
- JavaScript
- LessCSS
- CSS
- jQuery
- Bootstrap
- Foundation
- Ruby on Rails
- Wordpress
- Ajax

Projects

Fieldr (www.fieldr.co)
Developer
(August 2013)
- Won 3rd place out of 20 teams competing at Startup Weekend EDU
- Developed Fieldr, a tool to help teachers find fun and new field trip ideas based on location, curriculum requirements and budget
